Grow your business with
Encore for Jewellers

What is Encore?

Encore is a suite of software for ERP (Enterprise Resource Planning). It incorporates accounting and financial features along with stock, sales and purchase order processing to manage your warehouse and inventory needs and replenishing and selling your goods. It is designed to integrate all your commercial processes into one system with one set of data to be shared for all users across a computer network.

Over 2,000 Encore SME customers love our software

From simple beginnings as a richly featured stock control system Encore has developed into a highly functional ERP software suite serving businesses of all shapes and sizes for more than 30 years. Our customers are loyal and have loved using the system for many years.

Why Choose Encore?

Encore was written to manage stock and customer sales and purchasing processes. We understand the jeweller's needs and features within Encore and our customer bespoke development services provide systems designed to fit your business and your industry.

Key Benefits

- One integrated solution
- High Return on Investment
- Reduced administration
- UK support desk
- Latest technology
- Ongoing updates
- Industry-specific features
- Fully customisable

“

As our business has grown, so has our understanding and use of Encore - it's been a powerful tool for our business. Our relationship with the team at Anagram is first class - they're friendly, approachable and always have time to help solve our problems. The quality of the backup support team is superb and I find this as important for system reliability.

”

Make every customer count

By improving your efficiency and customer service Encore helps to ensure that every customer you serve counts by providing the right product, at the correct price delivered on time to the right address. Less waiting time and more service ensures your customer comes back every time.

A Support desk with personalised friendly help and 8 hour resolution times

We are used to offering a high level of service on our support desk and we pride ourselves in providing 8 hour resolution times in 9 out of 10 cases. We answer all our calls personally and as we are authors of the software we can usually answer your questions immediately.

Easy to Use	Perfect for Growing Businesses	Tailored to Your Company	Seamless Integration
			
Dedicated Helpdesk	Remote Access from Tablet & Mobile	Secure Login	Upgrade When You Like

“

Going live in March 2003 proved to be really painless. Since then the package has been upgraded many times, even including some improvements that we have suggested, and has a wealth of new features including the Web Store module. This enables managing the web data and order import really easy.

”

Effective business management, affordably

Encore is aimed at the growing business. It is not designed for the large enterprise but for businesses looking for the next stage up from their current system. So Encore is priced affordably and offers hosted and on premise platforms with subscription pricing or financed options.

Why pay more than Encore?

Mid-market business software systems from large brands can cost the earth and are often the proverbial sledgehammer to crack a nut. With Encore you pay for what you buy with a system designed for your size and type of business.

Customisation to suit your business

Although our software is extremely comprehensive and will fit most types of growing businesses there are times when you require something specific to you. For this reason we offer a fully bespoke customisation service for those times when we have to create something special to resolve a specific issue.

Point of Sale

Integrating Encore into your tills and barcoding brings huge benefits:

- Fast product look up by brand, supplier, description, barcode or item number
- Handle lay-aways, wish lists, gift vouchers and special orders
- Add customer details, birthdays, anniversaries, hobbies and attach customers to marketing lists
- Log repairs and trade-ins

Stock Control

Controlling your stock is very easy and helps you to see where stock is and track each item no matter where it is and what is being done.

- Keep a comprehensive record of inventory information
- Control stock allocated to repairs and approvals
- Control your stock from multiple locations
- Keep track of items sent out on activity notes
- Monitor and record your quotes for future reference

Average cost		1222.00		1222.00	1222.00	0

Various modifications have been made to the package over the past few years and I have found it invaluable for running a growing business. We are delighted that this is a UK based business with software designed for UK businesses.

We have total faith in our data and in the people with Anagram – when there is a problem, they listen. They have the required technical skills, complete personal commitment and they are focused on providing customer service.

The most important benefit we have gained is the comfort factor. We now have a consistent, reliable piece of software with the ability to drill down easily into the detail of every job. I cannot speak highly enough of the service that I have received from Anagram, like the product itself it has been outstanding. I would recommend the same without hesitation.

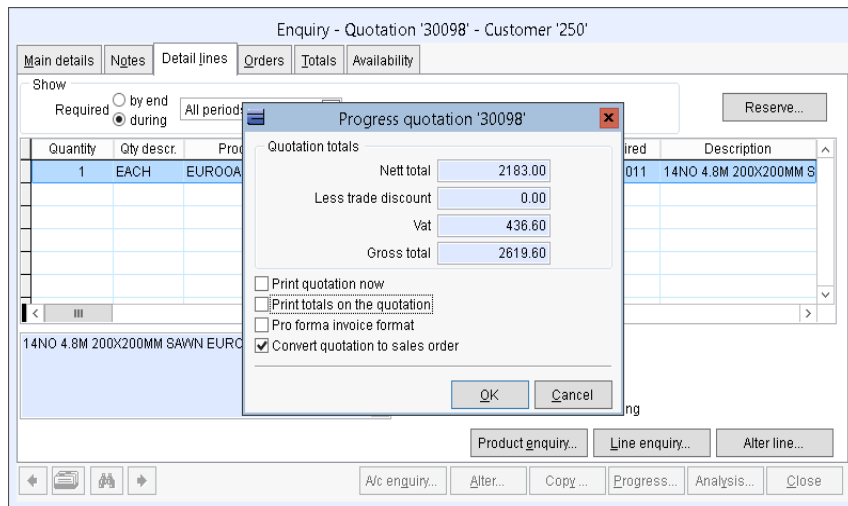

Manufacturing

- Create Assembly items and Bills of Materials
- Track up to date metal and stone prices
- Utilise Works Orders to manage manufacture of items and assemblies
- Manage and Plan your production to improve efficiency at every level

Quotations

Easily send or present your customer with a quotation and convert it into an order without any re-keying of information.

Quotation

Quotations can be from stock items or free text and can even be used as pro-formas.

Purchase Order Processing

The Purchase Order Process (POP) lets you keep in control of your buying.

Features include:

- Buying specials
- Back to back ordering
- Call-offs
- Part deliveries
- Seasonal ordering
- Copy orders
- Automatic and suggested orders
- XML orders - direct into suppliers' compatible systems without the need to re-key
- Multiple currency orders
- Receiving multiple purchase order deliveries from a supplier on one delivery receipt
- Matching of purchase order to supplier invoice

And many more features and functions designed specifically for Jewellers.

“

This package covers all aspects of our business, from accountancy, with the multi-currency options, sales and marketing, to stock control with stock movement and assembly analysis. There are so many useful features to Encore that we are still finding new areas to explore.

”

“

As our business has expanded Encore has grown with us, there has never been cause to even look at another system.

Stock inputting and reporting was a key requirement for us and through using Encore we can obtain quickly and easily all the information we need.

The system itself is very easy to navigate with a very user-friendly layout. From the initial sale through to implementation and beyond, the support from Anagram Systems has been excellent and we would certainly have no hesitation in recommending them.

”

“

Anagram seem to really understand smaller and growing business, which is one of the main reasons we decided to go with them over bigger companies. The level of support is always superb and our suggestions for software features have been added to version updates, so they really do take customer feedback on board.

”

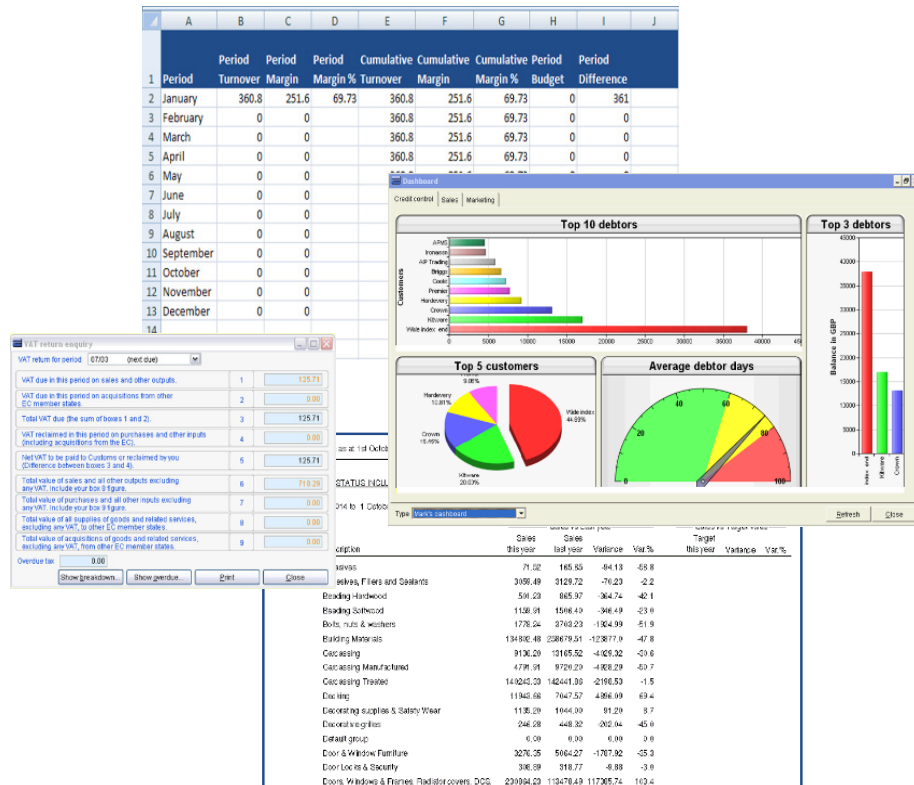

Financials, Back Office & Reporting

Encore would not be complete without its excellent back office system support. Sales, Purchase, Nominal ledgers and Cash Book provide cash flow, debtor, creditor, profit and loss and balance sheet reporting giving accounting staff the ability to produce meaningful and timely management accounts and reporting.

Data displayed on screen has drilldown options and reports can be routed to Excel for further analysis and manipulation. Likewise, on screen grids can be instantly output to an Excel workbook.

- Dashboard – customisable by user
- HMRC style VAT Return with drilldown
- ABC analysis of customers, products and suppliers
- Full financials
- Set and track budgets
- Handle exchange rates

Excel Output, Dashboard, VAT Return, Printed Reporting

CRM and Sales Opportunities

- Up-sell and cross-sell with EPOS sales prompts
- Sales forecasting - capturing, delegating and managing new opportunities
- Customer history - informing your sales people and operators about customer favourites and buying habits, stopped accounts - everything they need to be effective and exceed expectation
- Sales - creates quotations, enabling live entry of customer orders, sets up delivery schedules, updates stock balances and manages invoices and accounts receivable

How Encore can help your business

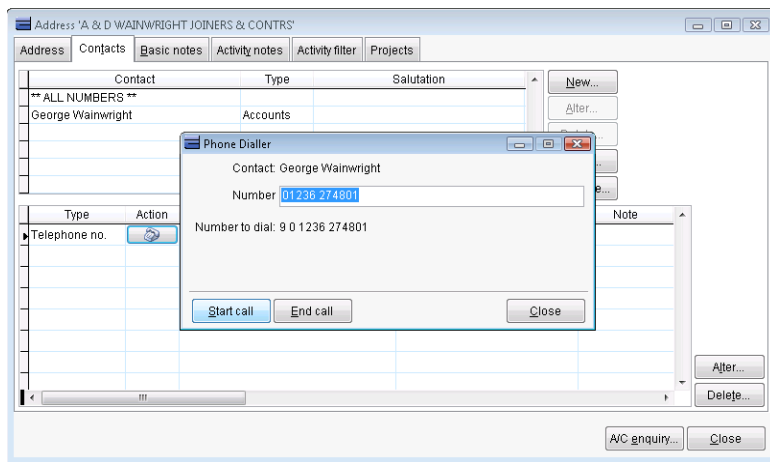

- A highly scalable solution to suit your growing needs
- High user satisfaction rates
- Improve staff productivity & reduce costs
- Built-in industry specific features
- Clear and affordable total cost of ownership

Telephone Integration

If your telephone system is TAPI compliant then you can use the outgoing telephone dialler direct from Encore.

Incoming calls bring up the contact details on screen in front of your operator, meaning staff can focus 100% on a call, and also check details with the caller quickly and easily.

Encore TAPI telephone integration

How Encore can help your business

- Fast and easy to use
- Affordability and value for money gives you a rapid and high return on investment
- Regular software updates, ongoing development and full bespoke tailoring service
- A dependable system which will last, evolve and adapt to your needs

Other Features

- Keep track of customer wish lists, supplier appointments and reminders with the Interactive Calendar
- Store images of your products to print onto receipts and other documents
- Record details of items brought in for repair and track them through all stages of the repair process
- Remote access through mobile or tablet
- Full CRM with Marketing and Email Functionality
- Integrated Online Sales
- Available as on-premise or hosted versions
- Easy product searches
- Facilitate transactions in multiple currencies

“

Anagram are the country's foremost experts on small business stock control systems. If you go with them, you get an excellent package at a remarkably cheap price... from a bunch of stock control experts who offer friendly telephone support if you get into trouble.

John Stokdyk **accountingWEB**”
